Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Funds outperformed their cash benchmark in June, with a weighted average rating of BBB. Financial markets in the month were caught between resilient economic growth and renewed inflation concerns linked to the ongoing conflict in the Middle East contributing to upward pressure on inflation expectations, prompting central banks to maintain a cautious stance. In spite of this, risk appetite remained robust, supported by strong corporate earnings and a generally healthy labour market. European securitised markets delivered strong performance during June, supported by favourable technicals, robust investor demand and attractive relative value versus corporate credit, with primary issuance across ABS, RMBS and CLOs well received and secondary spreads remaining stable to modestly tighter. US securitised markets also generated positive returns, driven by strong carry and continued investor demand for structured credit, while attractive relative value versus similarly rated corporate bonds continued to support market technicals. The Funds continued to add exposure in European CLO and US middle market CLO markets during the month, with a focus on European CLO resets offering higher spreads than newly ramped portfolios. Within the illiquid portfolio, the Funds extended the tenor of several asset warehouses in Europe and Australia, which continue to offer a spread premium over publicly rated equivalents
