Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund underperformed its cash benchmark in October. Risk assets posted gains due to robust earnings and easing inflation. European structured credit saw strong demand, steady issuance and stable spreads. Weakness was observed in junior parts of collateralised loan obligations (CLOs) but was limited to challenged collateral pools. Within US structured credit, spreads were unchanged, except for the automotive subprime sector, where spreads on AA and BB-rated paper widened. We continue to remain constructive on Tier 1 and Tier 2 issuers in the sector, given the tightening of lending standards over the last few years, as well as attractive relative value stemming from weaker spreads. Primary issuance was robust, reaching \$39.4 billion, led by the automotive and esoteric sectors. The Fund's activity was subdued over the month, as we remain fully invested. Performance was affected by spread weakness in subordinate CLO tranches and a mark down on one of our distressed positions.
