Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

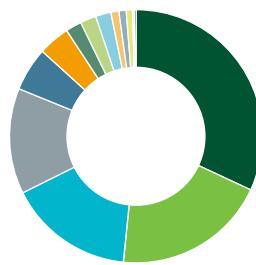

The Fund outperformed its cash benchmark in November. Risk assets were affected by uncertainty around the path of monetary policy across Europe, the US and the UK. European structured credit saw robust primary issuance and strong investor demand. The secondary market was initially quiet, but investors deployed capital towards the end of the month in anticipation of subdued issuance in December. US structured credit was resilient, with investors focusing on higher-quality assets. In November, the Fund focused on the lower mezzanine tranches of European collateralised loan obligations (CLOs) and UK asset-backed securities, taking advantage of their weakness relative to global markets. Over the month, performance was mixed, owing to the Fund's legacy positioning in commercial mortgage-backed securities and the mezzanine CLO tranches.
