FUND OBJECTIVE

The Fund seeks to generate a return for investors by investing primarily in a portfolio of debt securities

FUND SUMMARY

- Actively managed to aim to deliver an attractive absolute return through a long-term low turnover investment approach
- Aims to add value principally through attractive credits, continually managed to reflect Insight's credit views
- Aims to avoid flaws of a market-weight based benchmark approach, such as limiting unwanted concentration or bias towards most indebted issuers
- Rigorous, disciplined investment process drawing on a large team of credit analysts

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Comparator index measure shown is for the Markit iBoxx GBP Collateralised and Corporates ex-T1&UT2 (1% issuer cap/25% sector cap) Index until 31 July 2024. From 1 August 2024 the comparator index measure will be for the iBoxx Sterling Collateralised & Corporate (25% Sector Cap) Index, which has been used as a comparator for performance purposes. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The quarter saw credit spreads widen at almost all maturities as concerns rose around the extent and implications of US tariffs. Returns were further negatively impacted by rising longer dated gilt yields as the market factored in an increase in expected issuance. The fund modestly outperformed its comparator driven by low overall levels of risk and less exposure to issuers and sectors more acutely exposed to tariff risk such as consumer and industrial corporates with global supply and sales chains. In terms of activity, the fund participated in several attractively priced new issues including Affinity Water and Sainsbury's, a 'new' issuer in the GBP market with strong operating and financial performance. The fund maintains its defensive positioning as the tariff and trade uncertainty continues. Exposure to Thames Water was reduced. There were no other sales for credit concerns.
