Fund performance is shown for share class \$ £ Acc (performance start date 31/03/2011) and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. ## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in April, with a weighted average rating of AA+. Financial markets recovered some ground in April following the weakness seen in March, with sentiment improving as volatility eased and investors regained confidence in the broader macro backdrop. Credit spreads tightened modestly, supported by steady demand and resilient corporate fundamentals, while equities moved higher across most developed markets despite ongoing geopolitical tensions involving Iran and elevated energy prices. European ABS performed well in April, with strong investor demand absorbing primary supply which supported spreads, with outperformance coming from the lower end of the capital structure including CLO. US ABS markets also saw improving conditions, with issuance increasing and demand remaining robust across subsectors, although spreads ended broadly flat to slightly wider and secondary activity declined modestly. The Fund saw strong inflows during the month and deployed capital into primary issuance, focusing on European AA CLO paper and AAA rated European consumer assets, while also utilising secondary markets to add short dated Australian RMBS and UK consumer exposure. Fund performance was ahead of benchmark, driven by the rebound in spreads across asset classes.
