Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

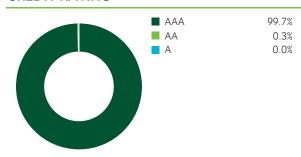

## **FUND MANAGER COMMENTS**

The Fund outperformed its cash benchmark in September, ending with an average rating of AAA. Risk assets were mixed amid more cautious investor sentiment. European structured credit finished the month strongly, showing resilience against market volatility. Issuance was robust. US structured credit saw a rebound in primary issuance, which reached \$37 billion. Spreads were largely unchanged, except for the mezzanine part of the subprime automotive sector, where spread widening was caused by the collapse of Tricolor, a company engaged in fraudulent activity. We remain constructive on Tier 1 and Tier 2 issuers in the sector. In September, the Fund was active in the primary market, taking advantage of robust new issue supply across sectors. The Fund deployed investor inflows and maturities from the Fund's short-dated holdings into shorter-dated paper within AAA tranches.
