CIR Long Dated Buy and Maintain Bond Fund

Q1 2026

> **BNY** | INVESTMENTS

Important disclosures

Risk disclosures

- **Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.**
- The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees, taxes and charges and these can have a material detrimental effect on the performance of an investment. Taxes and costs incurred when purchasing, holding, converting or selling any investment, will impact returns. Costs may increase or decrease as a result of certain currency conversions, such as currency hedging, investment exposure to international markets, and exchange rate fluctuations.
- Any target performance aims are not a guarantee, may not be achieved and a capital loss may occur. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies over time, and/or prevailing market conditions and are not an exact indicator. They are speculative in nature and are only an estimate. What you will get will vary depending on how the market performs and how long you keep the investment/product. Strategies which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected.
- Any projections or forecasts contained herein are based upon certain assumptions considered reasonable. Projections are speculative in nature and some or all of the assumptions underlying the projections may not materialise or vary significantly from the actual results. Accordingly, the projections are only an estimate.
- Portfolio holdings are subject to change, for information only and are not investment recommendations.

Associated investment risks

Fixed income

- Investments in bonds are affected by interest rates and inflation trends which may affect the value of the portfolio.
- A credit default swap (CDS) provides a measure of protection against defaults of debt issuers but there is no assurance their use will be effective or will have the desired result.
- The issuer of a debt security may not pay income or repay capital to the bondholder when due. The return risk to a portfolio is higher where a portfolio is highly concentrated in such an issuer.
- Derivatives may be used to generate returns as well as to reduce costs and/or the overall risk of the portfolio. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment.
- Investments in emerging markets can be less liquid and riskier than more developed markets and difficulties in accounting, dealing, settlement and custody may arise.
- Where high yield instruments are held, their low credit rating indicates a greater risk of default, which would affect the value of the portfolio.
- The investment manager may invest in instruments which can be difficult to sell when markets are stressed.
- Leveraged funds: as a result of market conditions, the value of the assets held by a Fund may fall and result in a higher degree of leverage than is deemed appropriate by the Investment Manager. In order to reduce the degree of leverage, the Investment Manager may seek to reduce a Funds' total asset exposure. Investors would need to subscribe for additional Shares in order to maintain the level of sensitivity to market movements. Where such an event is unanticipated, this may result in the investors having less sensitivity to market movements than they might consider appropriate to their individual requirements until they have subscribed for additional Shares
- While efforts will be made to eliminate potential inequalities between shareholders in a pooled fund through the performance fee calculation methodology, there may be occasions where a shareholder may pay a performance fee for which they have not received a commensurate benefit.

Associated investment risks

Responsible investment

- **Investment type:** The application and overall influence of responsible investment approaches may differ, potentially materially, across asset classes, geographies, sectors, specific investments or portfolios due to the nature of the specific securities and instruments available and the wide range of sustainability related and other relevant investment risks which may be considered.
 - **Integration:** The integration of sustainability risks within investment analysis refers to the inclusion of sustainability-related risk factors alongside traditional financial risk factors in investment analysis and research to judge the fair value of a particular investment and may also include the monitoring and reporting of such risks within a portfolio. Integrating sustainability-related risk analysis in this way will not typically restrict the potential investable universe, but rather aims to ensure that relevant and material risks are taken into account by analysts and/or portfolio managers in their decision-making.
 - **Ratings:** The use, influence and relevance of Insight's ESG ratings in specific investment strategies will vary, potentially significantly, depending on factors including the nature of the asset class and the structure of the investment mandate involved, including whether a strategy has a specific ESG or sustainability objective. The ratings are based on third-party data, which are provided and generated using proprietary methodologies of data providers. These providers may in turn depend on issuer data which could be inaccurate, incomplete or out of date. Insight's ratings therefore may require specialist interpretation. The methodologies we employ to aggregate data, generate ratings and apply these ratings in specific investment processes and strategies are subject to change.
 - **Engagement activity:** The relevance of Insight firm-level stewardship engagement activity and the outcomes of this activity relating to buy, hold and sell decisions made within specific investment strategies will vary, potentially significantly, depending on the nature of the asset class and the structure of the investment mandate involved.
 - **Reporting:** Information provided on sustainability-related measures or characteristics of a portfolio is for illustrative or indicative purposes, and does not in itself signify sustainability-related objectives or activity of the portfolio.
 - **Forward-looking commitments and related targets:** Where we are required to provide details of forward-looking targets in line with commitments to external organisations, these goals are aspirational and defined to the extent that we are able and in accordance with the third-party guidance provided. As such we do not guarantee that we will meet them in whole or in part or that the guidance will not evolve over time. Assumptions will vary, but include whether the investable universe evolves to make suitable investments available to us over time and the approval of our clients to allow us to align their assets with goals in the context of the implications for their investments and issues such as their fiduciary duty to beneficiaries.
- Insight applies a wide range of customised sustainability, climate or responsible investment related guidelines to mandates which can be tailored to reflect individual client requirements. Individual investor experience will vary depending on the investment strategy, investment objectives and the specific guidelines applicable to a Fund or portfolio. Please refer to the investment management agreement or offering documents such as the prospectus, Key Investor Information Document (KIID) or the latest Report and Accounts which can be found at www.insightinvestment.com and where applicable information in the following link for mandates in scope of certain EU sustainability regulations <https://www.insightinvestment.com/regulatory-home/sustainability-regulations/>; alternatively, speak to your main point of contact in order to obtain details of specific ESG parameters applicable to your investment.

Long Dated Buy and Maintain Bond Fund

Performance summary

Performance to 31 March 2026 (%)

	3 months (%)	1 year (%)	3 years (pa) (%)	5 years (pa) (%)	Since inception (pa) (%)
Long Dated Buy and Maintain Bond Fund	-3.50	4.46	2.72	-4.10	-0.26
Comparator index	-3.56	3.97	2.25	-4.58	-0.84

For clients and prospects based in Singapore:

This material is for Institutional Investors only. This documentation has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Shares may not be circulated or distributed, nor may Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor pursuant to Section 304 of the Securities and Futures Act, Chapter 289 of Singapore (the 'SFA') or (ii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

For clients and prospects based in Australia and New Zealand:

This material is for wholesale investors only (as defined under the Corporations Act in Australia or under the Financial Markets Conduct Act in New Zealand) and is not intended for distribution to, nor should it be relied upon by, retail investors.

Insight Investment Management (Global) Limited is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 in respect of the financial services; and is authorised and regulated by the Financial Conduct Authority (FCA) under UK laws, which differ from Australian laws. If this document is used or distributed in Australia, it is issued by Insight Investment Australia Pty Ltd (ABN 69 076 812 381, AFS License No. 230541) located at Level 2, 1-7 Blich Street, Sydney, NSW 2000.
