Source: Insight Investment and Rimes. Fund performance is shown for share class B € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 3 Month Euribor. Benchmark used is the shareclass currency equivalent of SONIA. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in February. Risks assets posted gains, despite elevated inflation and strong economic data. European structured credit performed well. Investors absorbed robust supply across several sectors and jurisdictions. Primary issues were oversubscribed, with mezzanine tranches enjoying strong demand. Collateralised loan obligations (CLOs) continued to rally. US structured credit posted gains, against elevated primary issuance and very strong demand. Senior spreads remained unchanged, while subordinated and esoteric tranches tightened. Investor consensus emerged around a 'soft landing' and the attractive relative value of asset-backed securities (ABS), despite the recent rally. We anticipate tighter lending conditions to ease competition in consumer lending, as banks de-risk and private and public capital step in. February was quiet on the lending side. Performance was driven by carry, with middle-market CLOs and aircraft ABS performing most strongly.
