Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in September, ending with a running yield of 92 bps ahead of one-month SONIA and a 99% weighting to AAA-rated assets. Risk assets sold off due to rising bond yields, elevated oil prices and the anticipation of rates remaining higher for longer. European structured credit was mixed, with performance driven by carry and gains from senior commercial mortgage-backed securities (MBS). Weaker credits exposed to rising interest rates saw an uptick in delinquencies. Over the month, issuance was robust across sectors and jurisdictions. The Fund took advantage of opportunities with attractive value and liquidity. Spreads widened within US structured credit, against weakened technicals. New issuance surged to surpass levels in the year prior and was easily absorbed by investors. Delinquencies and losses continued to edge higher across the consumer credit landscape. We added AAA-rated European and Australian automotive credits, as well as residential MBS.
